Bio-CS+

ADVANTAGES

Retain High P-Availability

Stimulate Early-Root
Formation

Promote Uniform Seed
Germination

OVERVIEW

Bio-CS+ is an organic acid based Crop-Start Additive (CS+) designed specifically for compatibility and application with ortho- & poly-phosphate fertilizers. Recommended use with starter in-furrow and/or 2x2 applications.

COMPATIBLE

- 10-34-0
- Acid Fertilizers

MADE
IN THE **USA**

CONTENTS

Total Nitrogen (N) 1%

1.0% Ammoniacal Nitrogen

Derived from Aqua Ammonia

Fulvic Acids 5%

Organic Acids 6%

8.6 lbs/gal

pH 5.3

PACKAGE OPTIONS

- ✓ 2.5 GAL
- ✓ 250 GAL TOTE
- ✓ BULK TRUCKLOADS & RAILCARS

APPLICATION RATES

Bio-CS+ should be used with soil applied starter and side dress fertilizer band applications.

Field Crops:

2-4 qts / acre with liquid fertilizer placed near the seed or in a sidedress prior to 40% of full plant height. 2 qts / acre if directly on seed

Vegetable Crops:

2-4-qts / acre in transplant water -or- with early-season fertigation

Cereal Crops:

2-4 qts / acre at planting

Mixing Instructions

Bio-CS+ can be applied by side dress and banding equipment water run through irrigation systems or sprayed directly on soils with other fertilizer materials.

Storage

Store in a cool/covered area in original container. Do not allow to material to freeze.
